

Heaven / Chair Design / Jean-Marie Massaud

The idea underlying the Heaven project is that of lightness derived from forms emerging from hollow spaces bordered by interweaving lines. The thin, woven steel frame is the distinctive feature of a collection marked by well-proportioned lines and overall harmony. Steel chairs paired with transparent glass tops lighten the table surfaces, lending them an intangible quality. The harmonious and sophisticated shapes of the Heaven range of furniture give the impression of unconventional elegance.

Description

Code: **485**
Typology: **Chairs**
Collection: **Heaven**

Stackable: 4
Static Load: 200 Kg
Cushion Material: Acrylic fabric

Technical Info

Width: **62 cm**
Depth: **59 cm**
Height: **79 cm**
Weight: **7.30 Kg**
Static Load: **200 Kg**

Packaging

Packages: **1**
Pieces for pack: **2**
Dimensions: **87x62x64 cm**
Volume: **0.345 mc**

Polyethylene bag and cardboard box

Heaven / Chair

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

Cushion Material

Acrylic fabric

The 100% acrylic fabrics combined with a polyurethane internal coating. This step makes it water-repellent, highly resistant to UV rays for excellent outdoor performance.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax. Evitare il contatto prolungato con sostanze grasse e/o coloranti che potrebbero venire assorbite dal materiale di rivestimento e dare luogo a macchie permanenti, oltre che deteriorare la struttura del filato. In caso di utilizzo vicino al mare o piscine si consiglia un lavaggio periodico. Lavaggi frequenti: seguire le istruzioni specifiche per ogni materiale riportate sull'apposita etichetta. Utilizzare acqua e detergenti liquidi non abrasivi con PH neutro e incolori. Eventualmente lasciare agire il detergente alcuni minuti. Sciacquare abbondantemente con acqua a temperatura non superiore a 30°C. Nel caso di utilizzo di dispositivi a pressione, tenere la punta del diffusore ad una distanza di almeno 60/70 cm dalla superficie del manufatto. Se necessario ripetere l'operazione. Non utilizzare spugne abrasive per smacchiare e non trattare con candeggina e cloro.
